

ADDITIONAL CALCIUM CHLORIDE STUDIES AS OF 2012

The following pilot studies and studies in progress are described in more detail in the Alliance for Contraception in Cats & Dogs (www.acc-d.org) literature review of calcium chloride nonsurgical dog and cat sterilization:

- Pilot study in 4 goats, Schouten et al. (USA)
- Farm use in goats and cats (USA)
- Controlled study, Leoci, et al., to be published winter 2012/2013 (Italy)

calcium chloride in saline (dose determination, 40 dogs)

calcium chloride in alcohol (21 dogs)

calcium chloride in lidocaine (21 dogs)

Further information about these studies is available from Parsemus Foundation (goat pilot study) or Dr. Raffaella Leoci (controlled dog study, Leocivet@yahoo.it).

PARSEMUS FOUNDATION

*Committed to innovative and/or neglected medical research,
with a focus on animal sterilants, contraceptive development, and breast cancer.*
