

Cats Behavior signs

Happy and friendly cat

- Body is generally relaxed.
- Tail carried high with the tip hanging over the back or relaxed and low.
- Ears erect.
- Eyes are wide open or if completely relaxed may appear half closed.
- Whiskers in neutral position.

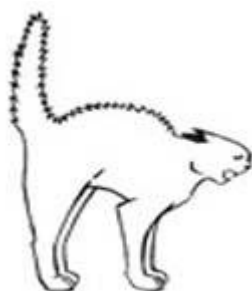

Frightened / timid cat

- Body low to the ground making itself look small.
- Generally the ears are laid flat on the head.
- Whiskers are laid back or flattened against the face.
- Tail may be under the body.

Defensive cat

- Tail is erect and fluffed up.
- Back arched and ears flat to head.
- Whiskers back and pupils dilated.
- Hissing.

Aggressive / ready to pounce cat

- Tail low and swishing.
- Straight back with head in line with the body.
- Ears forward.
- Whiskers bristling forward.
- Hissing with mouth open and teeth bared.
- Claws out.
